

2014

International Needle Coke & Graphite Electrode

Supervisor: China Carbon Industry Association

Host: Shanghai Xinluo Network Technology Co.,Ltd

www.iccsino.com

Graphite & Carbon Business

Date: April.10-11 2014

Venue: Dorsett Hotel

Topics (Draft)

1. Chinese macroeconomic situation
2. China carbon industry status quo and development trend
3. China steel industry current situation and future direction
4. China electric furnace steelmaking development and future trend
5. Development process of electric furnace steelmaking in developed countries
6. Production situation and market outlook of graphite electrode
7. Present situation and prospect forecast of needle coke market
8. The application of UHP graphite electrode in the new field

Program summary

(please read on-site notice for final arrangements)

April 10	Business exchanges and dinner activities
	China Iron and Steel Association
	China Carbon Industry Association
	China famous macro economists
	Northeastern University Institute of Materials and Metallurgy
April 11	Representatives of overseas needle coke enterprises
Keynote	Representatives of graphite electrode enterprises
Speech	ICC News Information Department
	Industry Chain Forum
	Attendees to exchange activities

Conference Background Conference Background

In 2013, China steel industry suffered huge loss, which triggered strong appeal from steel enterprises to lower costs. In this context, graphite electrode sector even see incidences like ultra high power (UHP) graphite electrode being replaced by high power (HP) products sometime. From the perspective of graphite electrode production, the "crowding-out effect" of low-cost and inferior quality products has become rather salient in recent years. Statistics compiled by ICC News show the total supply of needle coke in China in 2013 amounts to 161,000 tons, down 17% from 2012, among which imported needle coke accounts for 40%. The total supply of graphite electrode is 600,000 tons, down 6% year on year.

Meanwhile, with the projection of supply surge as well as falling prices of China's scrap steel, the proportion of electric furnace steel in China is expected to go up substantially, likely to reach the world average level of electric steel development. In addition, LF refining furnaces at iron and steel enterprises have undergone dramatic growth in recent years, which thus puts into mainstream demand for large-size electrodes and encourages the value of graphite electrode to return as electrodes with competitive price and of high quality become popular with downstream clients. Needle coke market will also come back on track. For needle coke producers, their core interest will continue to be making products of higher quality with competitive price whilst at a lower cost. ICC News forecasts that by 2020, China's crude steel concentration will reach approximately 820 million tons, among which the ratio of electric steel will rise to 20%, China's demand for graphite electrode will reach 550,000 tons, which will create a demand for needle coke of no less than 360,000 tons annually. The 2014 International Needle Coke And Graphite Electrode Summit Forum is dedicated to providing a comprehensive communication platform for all enterprises from needle coke, graphite electrode and related trade fields. We invite representatives of well-known needle coke and graphite electrode manufacturers from home and abroad, as well as new entrants and interested parties to join the meeting for extensive business exchanges. At the same time, we also invite experts from steel field to give in-depth analyses on current utilization of molten iron at electrical steel-making mills, as well as development trends and policy plan concerning the steel market.

Conference Participants

1. Domestic and international needle coke producers, domestic agents for overseas needle coke products, graphite electrode producers, anode material producers.
2. Coal chemical, petrochemical chemical enterprises interested in needle coke, steel mills and other smelters looking to purchase graphite electrodes.
3. Concerned third-party enterprises in environmental protection, academic research and media fields.

Conference fee

Before March.10, 2014, US\$1200 per person; on and after March 11: US\$1500 / person.

PS: Chinese and English simultaneous translation services are available at the conference. Please contact the Organizing Committee in advance if any other language services are needed. Conference fee includes conference materials (English Edition); airport pick up service and 2 days' hotel accommodation (April 10th- 11th, king bed or double bed room of the conference hotel. Please contact the Organizing Committee in advance if you need different type of rooms or other requirements.)

Account information

Name	Shanghai Xinluo Network Technology Co.,Ltd
A/ C NO	076428-98060154740005742
SWIFT	SPDBCNSHXXX
Bank Name	SHANGHAI PUDONG DEVELOPMENT BANK LVJIAZUI SUB-BRANCH
Bank Address	1/F TOMSOM INTERNATIONAL COMMERCIAL BUILDING 710 DONGFANG ROAD PUDONG SHANGHAI CHINA

Conference Acknowledgment Form

Full name of the enterprise (Invoice Title)					
Contact address					
Nature of the enterprise	<input type="checkbox"/> Domestic producer <input type="checkbox"/> Overseas supplier <input type="checkbox"/> Domestic trader <input type="checkbox"/> Downstream user <input type="checkbox"/> Third party service business				
E - MAIL				Postal code	
Name of the delegate	Gender	Position	Fixed Line	Mobile Phone	Fax
Accommodation reservation requirement (registration fee prepaid only)	<input type="checkbox"/> Yes <input type="checkbox"/> No	Accommodation standard: <input type="checkbox"/> Standard Single <input type="checkbox"/> Standard Twin 10th <input type="checkbox"/> 11th <input type="checkbox"/> Total number of nights			
Total conference fee (accommodation fee not included)				¥	
Whether you have carefully read about the "notes" Notes	<input type="checkbox"/> Yes <input type="checkbox"/> No	Signature: _____ <div style="text-align: right;">(company chop)</div> Date(dd/mm/yy): _____			
Fax return reply to: 4006-888-552 Recipient :					

Notes

1. The deadline for conference material print is April 1. For enterprise that submits the confirmation note after the deadline or registers on-site, their materials will be consigned in temp contact list.
2. Conference organizing committee will provide room reservations for as long as 12 hours at the hotel where the meeting is held for participant that makes payment in advance. And room reservation services are not available for participant that pays on-site.
3. The deadline for registration is April 1 due to conference organization requirement. After this time, please register on site. You shall cover the whole payment loss caused by cancellations after April 1; however replacement of delegates at any time before the conference is acceptable; and for other cancellations, you shall cover 20% of the loss.
4. Service Hotline: 021-50184980/1 4006-888-552
